CRANE SKIP

STANDARD FEATURES

Safety First!

Our crane skips come with Tag Line attachment points. This feature allows you to maneuver safely away from any pinch points.

CWB Certified Welding

Our CWB certified welders & welding procedures guarantee exceptional weld quality. This helps contribute to the overall life-cycle of our products.

Manufactured Above Industry Standard

SCS manufactures products beyond industry standards that delivers a longer life span with less cost on maintenance. Less down time means higher rates of return on your business.

In House Design

SCS offers a service to customers to design products based on specific business requirements. We encourage customers to communicate their needs and we will come up with the solutions.

Weight Rated

All crane skips are weight rated for job site applications. Discuss with our team your plans and we will come up with the calculations to maximize your custom crane skip.

SCS skips are manufactured above industry standard.
Reduce your maintenance costs & maximize uptime.

AVAILABLE OPTIONS

Self Dumping Crane Skip

Our new Self Dumping Crane Skip means being able to move material around a site or from a machine efficiently.

Fork Pockets

Fork Pockets are a great addition to any crane skip. They allow ground movement of a crane skip with Fork equipped machinery. Fork pockets can be modified to fit your needs.

Heavy Duty Upgrade

Heavy Duty or structural reinforcing can be added to your Crane Skip if required for specific materials applications.
